Summary

Computer Science graduate (2025) with hands-on internship experience in ML engineering, NLP chatbot development, and full-stack applications. Proficient in Python, TensorFlow, Scikit-learn, and SQL, with practical exposure to deep learning, LLMs, and Generative AI. Seeking entry-level roles in Data Science, Data Analytics, ML Engineering, Python Development, or AI Engineering.

Technical Skills

Programming	Python, SQL, Java
Data & Analytics	Pandas, NumPy, Matplotlib, Seaborn, Power BI, EDA, Feature Engineering, Data Cleaning, Data Preprocessing
Machine Learning	Scikit-learn, Classification, Regression, Clustering (K-Means, Hierarchical), Model Evaluation, CRISP-ML(Q)
Deep Learning & AI	TensorFlow, CNNs (DenseNet121), NLP, LLMs, Generative AI, Prompt Engineering, Chatbot Development, Model Deployment
Tools & Platforms	Git, GitHub, Jupyter, Anaconda, Botpress V12, Vertex AI, AWS (Basic), REST APIs
Databases	MySQL, MongoDB

Experience

ML & Chatbot Engineering Intern <i>Fluentgrid Limited</i>	Jun 2024 – Aug 2024 <i>Visakhapatnam, India</i>
- Designed and deployed a production-grade NLP chatbot using Botpress V12, automating ~70% of repetitive support queries and reducing manual workload by 30%. - Engineered intent recognition and entity extraction pipelines, expanding chatbot intent coverage by 40% across 500+ FAQ scenarios. - Integrated chatbot with backend REST APIs for real-time, data-driven responses, reducing average resolution time for complex queries by ~25%.	
Full Stack Developer Intern <i>Fluentgrid Limited</i>	Jun 2023 – Jul 2023 <i>Visakhapatnam, India</i>
- Built 3 client-facing web modules using Java, Spring Boot, and React.js, streamlining enterprise data-entry workflows. - Resolved 10+ production-level defects through systematic debugging and code profiling, improving backend response performance on critical modules.	

Projects

Automated Diabetic Retinopathy Detection <i>Python, TensorFlow, DenseNet121, CNN, OpenCV</i> GitHub	
- Trained a DenseNet121-based CNN on 3,662 retinal fundus images (APTOS 2019 dataset) to classify Diabetic Retinopathy across 5 severity stages, achieving 92% validation accuracy. - Applied CLAHE enhancement, rotation, flip, and zoom augmentation to address class imbalance, improving minority-class F1-score by 18% over baseline; evaluated using confusion matrix, precision-recall, and AUC-ROC.	
Customer Query Resolution Chatbot <i>Botpress V12, NLP, Node.js, REST APIs</i>	
- Deployed an end-to-end NLP chatbot automating 500+ FAQ resolutions, cutting manual query handling time by 30%. - Engineered multi-turn dialogue flows with slot filling and context retention, enabling accurate resolution of 85%+ of complex multi-step queries.	
Sales Analytics Dashboard <i>Python, Pandas, SQL, Matplotlib, Power BI</i>	
Designed an end-to-end analytics pipeline on a retail sales dataset — cleaned and transformed 50K+ rows, engineered KPI metrics, and built an interactive Power BI dashboard tracking revenue, churn, and regional trends.	

Education

Sanketika Institute of Technology and Management, JNTUG-V	2021 – 2025
<i>B.Tech in Computer Science & Engineering</i>	<i>CGPA: 7.63</i>
Intermediate: 96.1% SSC: GPA 10.00	

Certifications

Data Science & AI Professional Course (<i>in progress</i>)	360DigiTMG
Generative AI & ChatGPT	Google
Google Analytics (<i>Beginner & Advanced</i>)	Google
AI Student Development Program	SRM University
Full Stack Development, Java Basics, Git & GitHub	ExcelR
Salesforce Apex Specialist & Process Automation Specialist	Trailhead
Goldman Sachs & Accenture Virtual Experience Programs	Forage

Languages

English (Fluent) · Telugu (Fluent) · Hindi (Intermediate)
